

The Art of Animation

Our Goals:

- _ To define key vocabulary words related to PowerPoint presentations
- _ To learn how to manipulate the way a slide looks
- _ To learn how to use transitions, clip art and sounds to create a unique presentation
- _ To create a multimedia slide show with original content

Technological Skills

Students will:

- Create a new slide
- Save a presentation
- Add text to a slide
- Insert new slides
- Use design templates
- Edit text
- Change font color
- Use layout templates
- Open a saved presentation
- Insert images from file
- Save images from the Internet
- Research information on the Internet
- Copy and paste text
- Resize images
- Move images
- Use the draw tools
- Insert text boxes
- Delete objects from a slide
- Edit shape properties
- Insert animated clip art
- Use the slide sorter to view slides
- Move slides
- Add transitions between slides
- Add transition sounds
- Change transition speed
- Preview the presentation

Educational Skills

Students will:

- Plan and develop and multi-slide presentation
- Create slides in a logical order
- Write and edit relevant text
- Choose appropriate clipart images, pictures, animated clips and sounds.
- Express themselves creatively
- Follow copyright laws when using information obtained from the Internet
